The Mediterranean in motionThe risks in the baseline scenario; Facing sustainable development challenges; Striving for more sustainable development; Concluding remarks; Statistical Annex; List of Figures, Tables and Boxes; List of Acronyms and Abbreviations; Index

Sommario/riassunto

'Here's a work arriving just at the right moment and contributing new insights at precisely the time when public opinion remains sceptical of the not very promising future we are preparing for our children, when governments balk at explaining to their electorates the vital but unpopular decisions that have to be taken and when civil society, with few ways and means, is finally becoming involved. This remarkable work will help all actors to understand the inter-linkages between economic activities and the environment in the Mediterranean Basin and take concerted, effective action to build a posi
