

1. Record Nr.	UNINA9910452817903321
Titolo	Border encounters : asymmetry and proximity at Europe's frontiers / / edited by Jutta Lauth Bacas and William Kavanagh
Pubbl/distr/stampa	New York : , : Berghahn Books, , 2013
ISBN	1-78238-138-4
Descrizione fisica	1 online resource (302 p.)
Altri autori (Persone)	Lauth BacasJutta <1956-> KavanaghWilliam
Disciplina	303.48/24
Soggetti	Borderlands - Europe Regionalism - Europe Electronic books. Europe Ethnic relations Case studies
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Description based upon print version of record.
Nota di bibliografia	Includes bibliographies and index.
Nota di contenuto	Border encounters : asymmetry and proximity at Europe's frontiers / Jutta Lauth Bacas and William Kavanagh -- Consumer rites : the politics of consumption in a re-unified Germany / Daphne Berdahl -- Cross-border relations and regional identity on the Polish-German border / Robert Parkin -- Anti-nuclear activism at the Czech-Austrian border / Birgit Møller -- Powerful documents : passports, passages and dilemmas of identification on the Georgian/Turkish border / Mathijs Pelkmans -- Proximity and asymmetry on the Portuguese/Spanish border / William Kavanagh -- Asymmetries of gender and generation on a post-Soviet borderland / Laura Assmuth -- 'We are all tourists' : enduring social relations and changing proximities and asymmetries at the Romanian-Serbian border in different mobility regimes / Cosmin Radu -- 'We used to be one country' : rural transformations, economic asymmetries and national identities in the Ukrainian-Russian borderlands / Tatiana Zhurzhenko -- Under one roof : six years of border crossings in Cyprus / Lisa Dikomitis -- The birth of a border : policing by charity on the Italian maritime edge / Maurizio Albahari -- Managing proximity and asymmetry in border encounters : the reception of undocumented migrants on a Greek border island / Jutta

Sommario/riassunto

Among the tremendous changes affecting Europe in recent decades, those concerning political frontiers have been some of the most significant. International borders are being opened in some regions while being redefined or reinforced in others. The social relationships of those living in these borderland regions are also changing fundamentally. This volume investigates, from a local, ground-up perspective, what is happening at some of these border encounters: face-to-face interactions and relations of compliance and confrontation, where people are bargaining, exchanging goods and information,

Kirchhoff's Current Law 117 -- 3.5.2. Kirchhoff's Voltage Law 123 -- 3.5.3. Thevenin's and Norton's Theorems 127 -- 3.6. Applications of Single-Phase Circuit Analysis 128 -- 3.7. Summary 140 -- 3.8. Exercises 141 -- 3.9. Problems 141 -- 4 THREE-PHASE CIRCUITS 145 -- 4.1. Three-Phase Quantities 146 -- 4.2. Wye-Connected Generator 151 -- 4.3. Wye-Connected Loads 155 -- 4.3.1. Balanced Wye Load (Four-Wire System) 156 -- 4.3.2. Unbalanced Wye Load (Four-Wire System) 158 -- 4.3.3. Wye-Connected Three-Wire System 160 -- 4.4. Delta-Connected System 162 -- 4.4.1. Delta-Connected Generator 162 -- 4.4.2. Balanced Delta Load 163 -- 4.4.3. Unbalanced Delta Load 166 -- 4.5. Summary 168 -- 4.6. Three-Phase Power Measurement 174 -- 4.6.1. Four-Wire System 175 -- 4.6.2. Three-Wire System 175 -- 4.7. Per-Unit System 177 -- 4.8. Symmetrical Components 182 -- 4.8.1. Calculation of Phase Voltages from Sequential Components 182 -- 4.8.2. Calculation of Sequential Components from Phase Voltages 183 -- 4.8.3. Sequential Components of Impedance Loads 184 -- 4.9.

Application Examples 188 -- 4.10. Exercises 203 -- 4.11. Problems
204 -- 5 TRANSMISSION LINES AND CABLES 207 -- 5.1. Construction
208 -- 5.2. Components of the Transmission Lines 215 -- 5.2.1.
Towers and Foundations 215 -- 5.2.2. Conductors 216 -- 5.2.3.
Insulators 218 -- 5.3. Cables 223 -- 5.4. Transmission Line Electrical
Parameters 224 -- 5.5. Magnetic Field Generated by Transmission
Lines 225 -- 5.5.1. Magnetic Field Energy Content 229 -- 5.5.2. Single
Conductor Generated Magnetic Field 230 -- 5.5.3. Complex Spatial
Vector Mathematics 233 -- 5.5.4. Three-Phase Transmission Line-
Generated Magnetic Field 234.
5.6. Transmission Line Inductance 239 -- 5.6.1. External Magnetic Flux
240 -- 5.6.2. Internal Magnetic Flux 241 -- 5.6.3. Total Conductor
Magnetic Flux 243 -- 5.6.4. Three-Phase Line Inductance 244 -- 5.7.
Transmission Line Capacitance 249 -- 5.7.1. Electric Field Generation
249 -- 5.7.2. Electrical Field around a Conductor 250 -- 5.7.3. Three-
Phase Transmission Line Generated Electric Field 256 -- 5.7.4. Three-
Phase Line Capacitance 271 -- 5.8. Transmission Line Networks 273 --
5.8.1. Equivalent Circuit for a Balanced System 273 -- 5.8.2. Long
Transmission Lines 277 -- 5.9. Concept of Transmission Line
Protection 282 -- 5.9.1. Transmission Line Faults 282 -- 5.9.2.
Protection Methods 285 -- 5.9.3. Fuse Protection 285 -- 5.9.4.
Overcurrent Protection 285 -- 5.9.5. Distance Protection 288 -- 5.10.
Application Examples 289 -- 5.10.1. Mathcad
 Examples 289 --
5.10.2. PSpice
: Transient Short-Circuit Current in Transmission
Lines 302 -- 5.10.3. PSpice: Transmission Line Energization 304 --

Sommario/riassunto

Provides relevant material for engineering students and practicing engineers who want to learn the basics of electrical power transmission, generation, and usage. This Second Edition of Electrical Energy Conversion and Transport is thoroughly updated to address the recent environmental effects of electric power generation and transmission, which have become more important in conjunction with the deregulation of the industry. The maintenance and development of the electrical energy generation and transport industry requires well-trained engineers who are able to use
