

1. Record Nr.	UNINA9910452843703321
Autore	Anderson Anthony B
Titolo	Applying Nature's Design [[electronic resource]] : Corridors as a Strategy for Biodiversity Conservation
Pubbl/distr/stampa	New York, : Columbia University Press, 2006
Descrizione fisica	1 online resource (243 p.)
Altri autori (Persone)	JenkinsClinton N
Disciplina	333.9516
Soggetti	Corridors (Ecology) Electronic books.
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Description based upon print version of record.
Nota di contenuto	Contents; List of Figures; Acknowledgments; 1. Introduction; 2. Conceptual Foundations of Corridors; 3. Corridor Design; 4. Corridor Implementation; 5. Case Studies; Notes; References; Index
Sommario/riassunto	The fragmenting of habitats is endangering animal populations and degrading or destroying many plant populations throughout the world. To address this problem, conservationists have increasingly turned to biological corridors, areas of land set aside to facilitate the movement of species and ecological processes. However, while hundreds of corridor initiatives are under way worldwide, there is little practical information to guide their design, location, and management. ""Applying Nature's Design"" offers a comprehensive overview of current knowledge on corridors, their design, and the
