Sommario/riassunto	Increasingly, environmental decision making is like playing a multidimensional game of chess. With interactions between the atmosphere, the litho-hydrosphere, and the biosphere, the game is at once a measure of complexity, uncertainty, interdisciplinary acuity, social-environmental sustainability, and social justice for all generations. As such, it demands a systemic point of view. Decision Making for a Sustainable Environment: A Systemic Approach gives readers the tools to replace the dysfunctional, symptomatic decision making that has plunged the world into envir
