	Disciplina	305.813
	Soggetti	National characteristics, American
		Ethnopsychology - United States
		Electronic books.
	Lingua di pubblicazione	Inglese
	Formato	Materiale a stampa
	Livello bibliografico	Monografia
	Note generali	Description based upon print version of record.
	Nota di bibliografia	Includes bibliographical references and index.
	Nota di contenuto	pt. 1. Character -- pt. 2. Politics -- pt. 3. Autonomy.
	Sommario/riassunto	The Lonely Crowd is considered by many to be the most influential book of the twentieth century. Its now-classic analysis of the "new middle class" in terms of inner-directed and other-directed social character opened exciting new dimensions in our understanding of the psychological, political, and economic problems that confront the individual in contemporary American society. The 1969 abridged and revised edition of the book is now reissued with a new foreword by Todd Gitlin that explains why the book is still relevant to our own era." As accessible as it is acute, The Lonely Crowd is indispensable reading for anyone who wishes to understand American society. After half a century, this book has lost none of its capacity to make sense of how we live."-Todd GitlinPraise for the earlier editions:"One of the most penetrating and comprehensive views of the twentieth-century urban American you're likely to find."-Commonweal"Brilliant and original."-Arthur M. Schlesinger, Jr.

	Nota di contenuto	Benchmarking Implementations of Term Rewriting and Pattern Matching in Algebraic, Functional, and Object-Oriented Languages - The 4th Rewrite Engines Competition -- Automaton and Equation based Approximations for Reachability Analysis -- Multiparadigm Programming in Maude -- MUnit: A Unit testing framework for Maude -- Parameterized Programming for Compositional System Specification -- Specification and Verification of Data-aware BPMN Processes using Rewriting Modulo SMT -- Associative Unification and Symbolic Reasoning Modulo Associativity in Maude -- Proving Structural Properties of Sequent Systems in Rewriting Logic -- Formal Modeling

and Analysis of the Walter Transactional Data Store -- Extending Timbuk to Verify Functional Programs -- Generalized Rewrite Theories and Coherence Completion -- Proving Ground Confluence of Equational Specifications Modulo Axioms -- Uniform Strong Normalization for Multi-Discipline Calculi -- Real-time Rewriting Logic Semantics for Spatial Concurrent Constraint Programming -- Approximating any Logic Program by a CS-Program.

Sommario/riassunto	This book constitutes revised selected papers from the 12th International Workshop on Rewriting Logic and Its Applications, WRLA 2018, held in Thessaloniki, Greece, in June 2018. The 12 full papers presented in this volume were carefully reviewed and selected from 21 submissions. They deal with rewriting, a natural model of computation and an expressive semantic framework for concurrency, parallelism, communication, and interaction, and its applications. .
