Sommario/riassunto The visualization process doesn't happen in a vacuum; it is grounded in

principles and methodologies of design, cognition, perception, and human-computer-interaction that are combined to one's personal knowledge and creative experiences. Design for Information critically examines other design solutions "current and historic" helping you gain a larger understanding of how to solve specific problems. This book is designed to help you foster the development of a repertoire of existing

methods and concepts to help you overcome design problems.
