Sommario/riassunto

This book focuses on achieving a better understanding of the implications of international migration for national development from the perspective of the sending countries (with an emphasis on sub-Saharan Africa). More specifically, the purpose of this volume is to explore (1) current perceptions - as seen from the perspective of the countries of origin - of the links between international migration and national development, and (2) current trends in policy making aimed at minimising the negative effects, while optimising the development impact. What are the dominant views and policy initiatives in the different countries of sub-Saharan Africa? It is concerned with the question of how a coherent international migration policy can contribute to the fight against poverty. In the book, update information is given of migration-development nexus in various countries, including Senegal and Burkina Faso, Botswana and Mozambique, Nigeria and Kenya . Attention is additionally paid to Mexico, the Philippines and the People's Republic of China.
