

1. Record Nr.	UNINA9910452978103321
Titolo	Current topics in the theory and application of latent variable models / / edited by Michael C. Edwards and Robert C. MacCallum
Pubbl/distr/stampa	New York : , : Routledge, , 2013
ISBN	0-203-81340-5 1-283-89358-4 1-136-69980-5
Descrizione fisica	1 online resource (297 p.)
Altri autori (Persone)	EdwardsMichael C <1977-> (Michael Charles) MacCallumRobert C
Disciplina	519.5/35
Soggetti	Latent structure analysis Latent variables Electronic books.
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Description based upon print version of record.
Nota di bibliografia	Includes bibliographical references and indexes.
Nota di contenuto	pt. 1. Complexities in latent variable modeling -- pt. 2. Drawing meaning from latent variable models.
Sommario/riassunto	This book presents recent developments in the theory and application of latent variable models (LVMs) by some of the most prominent researchers in the field. Topics covered involve a range of LVM frameworks including item response theory, structural equation modeling, factor analysis, and latent curve modeling, as well as various non-standard data structures and innovative applications. The book is divided into two sections, although several chapters cross these content boundaries. Part one focuses on complexities which involve the adaptation of latent variables models in research
