Resource management and policy alternatives -- pt. V. Discrimination and socio-economic equity in development -- pt. VI. Peasant distress and sustainability of the cotton economy.
Sommario/riassunto	Asian economic development and environmental consequences are not only crucial for the wellbeing of the people, but are of great relevance for the global economy. The ongoing intense debate on carbon emission mitigating strategies for reducing the impact of environmental consequences has undermined the principle of equity and put a question mark on the sustainability of the development process of the most dynamic Asian economies. This volume explores fresh perspectives on the issues of wellbeing, Asian economic

development and environmental concerns. The book is organised along
