

1. Record Nr.	UNINA9910453026903321
Titolo	Potassium channels [[electronic resource]] : types, structure and blockers // Danielle S. Fonseca, editor
Pubbl/distr/stampa	Hauppauge, N.Y., : Nova Biomedical Books, c2012
ISBN	1-61470-024-9
Descrizione fisica	1 online resource (159 p.)
Collana	Cell biology research progress
Altri autori (Persone)	FonsecaDanielle S
Disciplina	547/.05383
Soggetti	Potassium channels Electronic books.
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Description based upon print version of record.
Nota di bibliografia	Includes bibliographical references and index.
Nota di contenuto	Potassium channels and vascular tone : structure, regulation, and function / Elisa Cairrao, Ignacio Verde -- The contribution of lymphocyte potassium channels to the perinatal regulation of the immune response in mother and newborn / Gergely Toldi, Barna Vasarhelyi -- Mitochondrial potassium channel : feature and physiological participation / R. Milan, F. Martinez -- Slow potassium channel dysfunction in amyotrophic lateral sclerosis and its in vivo evaluation by threshold tracking / Hiroyuki Nodera -- Characteristics of potassium channels of smooth muscle in health and disease / Yasushi Sakai, Michio Hashimoto -- Individual potassium channel proteins display characteristic patterns in rate cerebellum and olfactory bulb / Angelike Gortzen ... [et al.] -- Plant mitochondrial potassium channel or channels / Donato Pastore, Maura Nicoletta Laus, Mario Soccio -- Involvement of the mitochondrial ATP-sensitive potassium channel in the beneficial effects of fasting on the ischemic-reperfusion rat heart / M.G. Marina Prendes ... [et al.].
