

1. Record Nr.	UNINA9910453035003321
Autore	Simonovic Slobodan P.
Titolo	Floods in a changing climate Risk management / / Slobodan P. Simonovic, University of Western Ontario [[electronic resource]]
Pubbl/distr/stampa	Cambridge : , : Cambridge University Press, , 2012
ISBN	1-139-85398-8 1-107-23542-1 1-139-84490-3 1-139-84016-9 1-139-08840-8 1-139-84254-4 1-139-84585-3 1-283-74661-1 1-139-84135-1
Descrizione fisica	1 online resource (xv, 179 pages) : digital, PDF file(s)
Collana	International hydrology series
Disciplina	363.34/932
Soggetti	Flood control
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Title from publisher's bibliographic system (viewed on 05 Oct 2015).
Nota di bibliografia	Includes bibliographical references and index.
Nota di contenuto	Flood risk management -- Climate change and risk of flooding -- Risk management as adaptation to climate change -- Risk management : probabilistic approach -- Risk management : fuzzy set approach -- Future perspectives.
Sommario/riassunto	Flood risk management is presented in this book as a framework for identifying, assessing and prioritizing climate-related risks and developing appropriate adaptation responses. Rigorous assessment is employed to determine the available probabilistic and fuzzy set-based analytic tools, when each is appropriate and how to apply them to practical problems. Academic researchers in the fields of hydrology, climate change, environmental science and policy and risk assessment, and professionals and policy-makers working in hazard mitigation, water resources engineering and environmental economics, will find this an invaluable resource. This volume is the fourth in a collection of

four books on flood disaster management theory and practice within the context of anthropogenic climate change. The others are: Floods in a Changing Climate: Extreme Precipitation by Ramesh Teegavarapu, Floods in a Changing Climate: Hydrological Modelling by P. P. Mujumdar and D. Nagesh Kumar and Floods in a Changing Climate: Inundation Modelling by Giuliano Di Baldassarre.
