forwardIndex

Sommario/riassunto

When and how do communication and history impact each other? How do disciplinary perspectives affect what we know? Explorations in Communication and History addresses the link between what we know and how we know it by tracking the intersection of communication and history. Asking how each discipline has enhanced and hindered our understanding of the other, the book considers what happens to what we know when disciplines engage. Through a critical collection of essays written by top scholars in the field, the book addresses the engagement of communication and history.
