Sommario/riassunto	In order to move global society towards a sustainable "ecotopia," solutions must be engaged in specific places and communities, and the authors here argue for re-orienting environmental anthropology from a problem-oriented towards a solutions-focused endeavor. Using case studies from around the world, the contributors-scholar-activists and activist-practitioners- examine the interrelationships between three prominent environmental social movements: bioregionalism, a worldview and political ecology that grounds environmental action and experience; permaculture, a design science for putting the
