Sommario/riassunto	This standard covers specifications of public-key cryptographic techniques for password-based authentication and key establishment, supplemental to the techniques described in IEEE Std 1363-2000 and IEEE Std 1363a-2004. It is intended as a companion standard to IEEE Std 1363-2000 and IEEE Std 1363a-2004. It includes specifications of primitives and schemes designed to utilize passwords and other low-grade secrets as a basis for securing electronic transactions, including schemes for password-authenticated key agreement and password-authenticated key retrieval. Keywords: authentication, key agreement, password, public-key cryptography.
