Sommario/riassunto

The current HIV and AIDS regime has opened up unknown vistas in intellectual pursuits and knowledge creation. One such newly opened up area of research is studying HIV and AIDS in relation to gender issues. However, owing to the devastating nature of the epidemic, most studies tend to focus on women merely as an ""at risk"" population leaving aside the wider sociological dimensions that pertain to women's sexuality in general, issues of AIDS related stigma and discrimination and how it impacts on women's careers as economic contributors to society. The uniqueness of the present study lies in
