

1. Record Nr.	UNINA9910453194803321
Autore	Abrams Richard <1937->
Titolo	Electroconvulsive therapy [[electronic resource] /] / Richard Abrams
Pubbl/distr/stampa	Oxford ; ; New York, : Oxford University Press, 2002
ISBN	0-19-803378-8
Edizione	[4th ed.]
Descrizione fisica	1 online resource (339 p.)
Disciplina	616.89122
Soggetti	Electroconvulsive therapy Shock therapy Electronic books.
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Description based upon print version of record.
Nota di bibliografia	Includes bibliographical references (p. 253-313) and index.
Nota di contenuto	Contents; 1. History of Electroconvulsive Therapy; 2. Efficacy of Electroconvulsive Therapy; 3. Prediction of Response to Electroconvulsive Therapy; 4. The Medical Physiology of Electroconvulsive Therapy; 5. Electroconvulsive Therapy in the High-Risk Patient; 6. The Electroconvulsive Therapy Stimulus, Seizure Induction, and Seizure Quality; 7. Treatment Electrode Placement: Bitemporal, Unilateral, Bifrontal; 8. Technique of Electroconvulsive Therapy: Theory; 9. Technique of Electroconvulsive Therapy: Praxis; 10. Memory and Cognitive Functioning After Electroconvulsive Therapy 11. Neurobiological Correlates and Mechanisms 12. Patients' Attitudes, Medicolegal Considerations, and Informed Consent; 13. Transcranial Magnetic Stimulation Therapy (TMS); References; Index
Sommario/riassunto	The updated edition of this text on electro convulsive therapy has new material covering the third edition of the American Psychiatric Association's Task Force Report on ECT (which lays out the boundaries within which ECT should be administered in the US) and a new chapter on transcranial magnetic stimulation (rTMS).
