Stevens and Alan J. Clapham -- Agricultural innovation and state collapse in Meroitic Nubia: the impact of the savannah package / Dorian Q. Fuller -- Islands of agriculture on Victoria Nyanza / Andrew Reid and Ceri Ashley -- Archaeobotanical investigations of the Iron Age Lundu State, Malawi / Ingrid Heijen -- Prehistoric plant use on La Palma Island (Canary Islands, Spain): an example of the disappearance of agriculture in an isolated environment / Jacob Morales, Amelia Rodríguez and Aguedo Marrero -- Patterns in the archaeobotany of Africa: developing a database for North Africa, the Sahara and the Sahel / Ruth Pelling -- The archaeobotany of farming communities in South Africa: a review / Alexander Antonites, Annie Raath Antonites -- Linguistic evidence and the origins of food production in Africa: where are we now? / Christopher Ehret -- African agricultural tools: implications of synchronic ethnography for agrarian history / Roger Blench -- Leaving a lasting impression: arable economies and cereal impressions in Africa and Europe / Meriel McClatchie and Dorian Q. Fuller -- The use of plants in iron production: insights from smelting remains from Buganda / Louise Iles.

Sommario/riassunto

The first major synthesis of African archaeobotany in decades, this book focuses on Paleolithic archaeobotany and the relationship between agriculture and social complexity. It explores the effects that plant life has had on humans as they evolved from primates through the complex societies of Africa, including Egypt, the Buganda Kingdom, southern African polities, and other regions. With over 30 contributing scholars from 12 countries and extensive illustrations, this volume is an essential addition to our knowledge of humanity's relationship with plants.
