Sommario/riassunto	As author of the bestselling Why People Believe Weird Things and How We Believe, and Editor-in-Chief of Skeptic magazine, Michael Shermer has emerged as the nation's number one scourge of superstition and bad science. Now, in The Borderlands of Science, he takes us to the place where real science (such as the big bang theory), borderland science (superstring theory), and just plain nonsense (Big Foot) collide with one another. Shermer argues that science is the best lens through which to view the world, but he recognizes that it's often difficult for most of us to tell where valid science leav
