Better Land Husbandry and Policy; APPENDIX 1. Impact Monitoring and Assessment; REFERENCES; Index; Back Cover |
| Sommario/riassunto | This book is a timely contribution towards the debate on the most effective way to bring about sustainable farming in marginal areas. It offers a detailed analysis of the social, economic, and agro-ecological characteristic of both Soil and Water Conservation (SWC) and Better Land Husbandry (BLH) and an analysis of case studies of BLH from Central and South America, Africa, and Asia. |
