MOURNING / Vishnevetskaya, Marina -- THE DUMP / Levkin, Andrei

Sommario/riassunto

The largest, most comprehensive anthology of its kind, this volume brings together significant, representative stories from every decade of the twentieth century. It includes the prose of officially recognized writers and dissidents, both well-known and neglected or forgotten, plus new authors from the end of the century. The selections reflect the various literary trends and approaches to depicting reality in this era: traditional realism, modernism, socialist realism, and post-modernism. Taken as a whole, the stories capture every major aspect of Russian life, history and culture in the twentieth century. The rich array of themes and styles will be of tremendous interest to students and readers who want to learn about Russia through the engaging genre of the short story.

3. Record Nr.	UNINA9910139199403321
Autore	Windas Tom

ISBN	1-5044-0241-3
Descrizione fisica	1 online resource (48 pages)
Collana	IEEE Std ; ; 268-1979
Disciplina	389
Soggetti	Metric system
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Sommario/riassunto	This standard describes the International System of Units (SI), the modern version of the metric system. It includes listings of the base units, supplementary units, and units derived therefrom. Guidance is provided on application of the SI prefixes, other units in use with SI (including units accepted for limited use and units to be abandoned), and unit selection. A section on style and usage covers the writing of unit symbols and names, pronunciation, and recommendations for numbers. Extensive guidance is provided on conversion and rounding along with a very extensive table of conversion factors. An appendix provides background information in the development of SI.
