Nota di contenuto	Green dilemmas -- Sustainability -- Policy -- Behaviour change : policy and practice -- The social-psychology of environmental action -- Framing environmental practice -- Sustainable lifestyles -- The value-action gap -- Changing behaviour : a social marketing approach -- Sustainability, citizens and progress.
Sommario/riassunto	Environment and Society examines the complex relationships between humans and nature from a new perspective, incorporating recent moves to situate sustainable development within a household and individual context. Through a series of theoretical and practical chapters, it builds a comprehensive account of the complex factors that underlie our everyday attitudes and behaviour towards the natural environment.
