Sommario/riassunto	Few studies have looked into the governance of universities in societies affected by armed conflicts, because they are either meant for practitioners or focused on the role of universities for peace and development. Akiiki Babyesiza offers an in-depth analysis of the relationship between state, higher education, and society in a multicultural and multi-religious post-conflict setting and uses empirical data to question university governance concepts. She explores the role that civil wars played in university development and

governance in Sudan with a particular focus on Southern Sudan after the peace agreement of 2005 and before its secession in 2011. Sommario/riassunto

From Capture to Sale illuminates the experience of African slaves transported to Spanish America by the Portuguese in the early seventeenth century. It draws on exceptionally rich accounts of one of the most prominent slave traders, Manuel Bautista Pérez. These papers cover the whole journey of the slaves from Africa, through Colombia and Panama to their final sale in Peru. The prime focus of the study is on the diet, health and medical care of the slaves. It will not only be of interest to scholars of the slave trade, but also to those interested in the impact of the Columbian Exchange on diets, medicine and medical practice in the early modern period. The book is well illustrated and contains over thirty tables and seven appendices. From Capture to Sale has been selected by Choice as Outstanding Academic Title (2007).
