Sommario/riassunto	We need to expand our understanding both conceptually and practically of Appreciative Inquiry and how it is becoming a grassroots-powered transformational macro-management force in organizational life today. This volume aims to push the frontiers and solicit new tools and insights for expanding the state-of-the-art applications of AI. We aim for mindsets, management methods and governance structures that go beyond enterprise resource planning and value chains optimization, and move toward design - to the joint design of whole systems and bio-regions, whole organizations, and whole communities
