Note generali	Description based upon print version of record.
Nota di bibliografia	Includes bibliographical references.
Nota di contenuto	Genesis of TVET Research -- VET Research in Relation to VET Policy, Planning and Practice -- Areas of TVET Research -- Case Studies of TVET Research -- Research Methods.
Sommario/riassunto	Technical and vocational education and training (TVET) research has become a recognized and well-defined area of interdisciplinary research. This is the first handbook of its kind that specifically concentrates on research and research methods in TVET. The book's sections focus on particular aspects of the field, starting with a presentation of the genesis of TVET research. They further feature research in relation to policy, planning and practice. Various areas of TVET research are covered, including on the vocational disciplines and on TVET systems. Case studies illustrate different approaches to TVET research, and the final section of the book presents research methods, including interview and observation methods, as well as of experimentation and development. This handbook provides a comprehensive coverage of TVET research in an international context, and, with special focus on research and research methods, it is a

cutting-edge resource and reference.
