

1. Record Nr.	UNINA9910453459003321
Autore	Passant Alexandre
Titolo	Semantic web technologies for enterprise 2.0 // Alexandre Passant
Pubbl/distr/stampa	Heidelberg, Germany : , : IOS Press : , : AKA, , 2011 ©2011
ISBN	1-61499-343-2
Descrizione fisica	1 online resource (358 p.)
Collana	Studies on the Semantic Web, , 1868-1158 ; ; Volume 009
Disciplina	025.04
Soggetti	Semantic Web Web 2.0 Online social networks Electronic books.
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Description based upon print version of record.
Nota di bibliografia	Includes bibliographical references.
Nota di contenuto	Title Page; Remerciements; Acknowledgements; Contents; List of Figures; List of Tables; Listings; Part I. Introduction; Introduction; Context and Scientific Motivation; Context of the Thesis; Motivations and Research Questions; Main Results and Contributions; Overall Content of the Thesis; Content; Lecture Guide; Part II. Contributions; Chapter 1. Towards a Convergence Between Web 2.0 and the Semantic Web; Introduction; The Semantic Web: Knowledge Representation and Data Interoperability on the Web; Towards a Machine-readable Web; Knowledge Representation for the Web with RDF(S) and OWL Identifying and Representing Resources using URIs and RDFVocabularies and Ontologies for the Semantic Web: RDFS and OWL; Querying RDF Data Using SPARQL; The Semantic Web and the Web of Data; Web 2.0: From Readers to Consumers; A Collaborative Web; Blogs, Wikis, Social Networking and Content Syndication; Wikis and Personal Information Sharing; Wikis and Collaborative Information Management; RSS and Content Syndication; Social Metadata: Tags and Folksonomies; Content Sharing, Social Networking and Object-centred Sociality; A Convergence Between Web 2.0 and the Semantic Web Summary of these Two VisionsWeb 2.0 Assets for the Semantic Web; Semantic Web Assets for Web 2.0; Conclusion; Chapter 2. SemSLATES:

A Semantic Approach for Enterprise 2.0; Introduction; Collaboration in the Enterprise: the Athena Project; Motivations and Goals; The Hermes Platform; RSS for Information Integration and Sharing; Weblogs for Content Publishing; Wikis for Collaborative Knowledge Management; Document Annotation and Information Retrieval; Overall Integration of the Services; Usage Statistics; Issues of Enterprise 2.0 Ecosystems Information Fragmentation and Heterogeneity of Data Sources Knowledge Capture and Re-use; Tags, Folksonomies and Information Retrieval; Ambiguity Issues; Heterogeneity Issues; Lack of Organisation; Clustering Approaches and their Limits; Summary of the Different Issues; SemSLATES: A Semantic Ecosystem for Enterprise 2.0; The SemSLATES Methodology; A Social Semantic Middleware Architecture; Representation Models, Services and Adaptors; Producing Socio-structural Metadata From Existing Services; Knowledge Capture and Ontology Population; Tagging and Semantic Indexing Enhancing User Experience through Additional Services using RDF Data Related Work and Relevance of our Approach; Conclusion; Chapter 3. Ontologies for Enterprise 2.0; Introduction; Modelling Socio-structural Metadata for Web 2.0 Services with SIOC; Motivations; Related Work; The SIOC Ontology; Main Classes and Properties of SIOC; The SIOC Modules; Relationships and Alignment with Existing Vocabularies; DublinCore; FOAF; RSS 1.0; SKOS; SIOC, FOAF and Social Data Portability; Evaluation; Modelling Domain Ontologies; Requirements; Representing Agents Using FOAF and Extensions Representing Geolocation

Sommario/riassunto

In this book, we detail different theories, methods and implementations combining Web 2.0 paradigms and Semantic Web technologies in Enterprise environments. After introducing those terms, we present the current shortcomings of tools such as blogs and wikis as well as tagging practices in an Enterprise 2.0 context. We define the SemSLATES methodology and the global vision of a middleware architecture based on Semantic Web technologies and Linked Data principles (languages, models, tools and protocols) to solve these issues. Then, we detail the various ontologies that we build to achieve this g
