(Re-)building Educational Systems as a Contribution to Growth and Well-Being: Comparing Uganda and Cambodia / Leang Un -- 19. Policy and Governance in Africa's Economic Transformation: Firm Findings and Remaining Questions / David Booth -- Notes on Contributors.

Sommario/riassunto

Asian Tigers, African Lions is an anthology of contributions by scholars and (former) diplomats related to the 'Tracking Development' research project, funded by the Netherlands Ministry of Foreign Affairs, and coordinated by the African Studies Centre and KITLV, both in Leiden, in collaboration with scholars based in Africa and Asia. The project compared the performance of growth and development of four pairs of countries in Southeast Asia and Sub-Saharan Africa during the last sixty years. It tried to answer the question how two regions with comparable levels of income per capita in the 1950's could diverge so rapidly. Why are there so many Asian tigers and not yet so many African lions? What could Africa learn from Southeast Asian development trajectories? This book has won the Choice Outstanding Academic Title Award 2014!
