

1. Record Nr.	UNINA9910453527003321
Autore	Hardy Barbara Nathan
Titolo	A reading of Jane Austen [[electronic resource] /] / Barbara Hardy
Pubbl/distr/stampa	London, : Owen, 1975
ISBN	1-281-78350-1 9786611783501 1-84714-052-1
Descrizione fisica	1 online resource (193 p.)
Disciplina	823.7
Soggetti	English literature Electronic books.
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Description based upon print version of record.
Nota di contenuto	Contents; I: The Flexible Medium; II: The Feelings and the Passions; III: The Storytellers 1: Continuity, Climax and Conclusion; IV: The Storytellers 2: Imagination and Memory; V: Social Groups; VI: Properties and Possessions; VII: A Sense of the Author
Sommario/riassunto	A Reading of Jane Austen (first published by Peter Owen in 1975) has established itself with critics and readers as an outstanding contribution to the growing literature on this author, full of fresh and stimulating perceptions. Central to the work is Barbara Hardy's view of Jane Austen as the originator of the modern novel, largely through her creation of a new and flexible medium enabling her to move easily from sympathy to detachment, from one mind to many minds, from solitary scenes to social gatherings.

2. Record Nr.	UNINA9910556887803321
Autore	Rodrigo-Comino Jesus
Titolo	Land Quality and Sustainable Urban Forms : Changing Landscapes and Socioeconomic Structures of European Cities / / by Ilaria Tombolini, Jesús Rodrigo-Comino, Luca Salvati
Pubbl/distr/stampa	Cham : , : Springer International Publishing : , : Imprint : Springer, , 2022
ISBN	3-030-94732-7
Edizione	[1st ed. 2022.]
Descrizione fisica	1 online resource (176 pages)
Collana	Springer Geography, , 2194-3168
Disciplina	307.1216
Soggetti	Geography Human geography Urban ecology (Biology) Urban economics Agricultural ecology Regional Geography Human Geography Urban Ecology Urban Economics Agroecology
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Nota di bibliografia	Includes bibliographical references.
Nota di contenuto	Introduction -- Towards a sustainable use of land current policies coping with environmental degradation -- Mediterranean Europe, a fragile landscape -- Soil consumption and urban growth in Mediterranean Europe -- Preserving land quality in European metropolis -- Conclusions.
Sommario/riassunto	In the panorama of studies related to the ability of lands to support both natural processes and agricultural production activities, this research introduces a still unexplored or under-studied theme which is that of the relationship between urban sprawl in its various forms and land quality. The first part of the book is dedicated to the motivations and the theoretical premises from which the research originates, connected to the concept of land and those of sustainable urban form.

The second part concerns the complex path towards a sustainable use of land, both in terms of institutional and regulatory measures, and in terms of knowledge and understanding of soil degradation processes. This research focuses on the Mediterranean area which is discussed in more detail in the third part. In this part of Europe we try to establish relationships between settlement dynamics and land quality: here fragile ecosystems are diffused both from a biological point of view. physical as well as socio-economic, here we find landscapes that are particularly sensitive to land degradation processes (subject to land degradation, considered the antipodes of land quality) and which in recent decades have been particularly affected by anthropic pressure. In the fourth part, an analysis is presented concerning 76 metropolitan areas representative of southern Europe. The methodology used in this analysis is based on the relationship that exists between soil sealing (or soil waterproofing) and land degradation (or land degradation) aimed at an interpretation, at the metropolitan scale, of how in southern Europe the pattern of Urbanization (compact, dispersive, intermediate) affects the land's ability to support both natural processes and agricultural production activities in a diversified way. In particular, the data on land quality and data on land use were considered together in order to analyze the processes of urban growth and the occupation of productive land for a very large area that includes Greece, France, Italy, Spain, Portugal and some parts of the Adriatic coast. There is still a long way to go, in terms of sharing, integration and definition of strategies aimed at achieving certain targets. A necessary and innovative look towards land quality could help to consider the protection of the soil as a whole, even at the planning level.
