

1. Record Nr.	UNINA9910453552303321
Titolo	Alternative forms of knowing (in) mathematics [[electronic resource]] : celebrations of diversity of mathematical practices // edited by Swapna Mukhopadhyay and Wolff-Michael Roth
Pubbl/distr/stampa	Rotterdam, : Sense Publishers, 2012
ISBN	94-6091-920-0 94-6091-921-9
Edizione	[1st ed. 2012.]
Descrizione fisica	1 online resource (320 pages)
Collana	New Directions in Mathematics and Science Education ; ; v.24 New directions in mathematics and science education ; ; v. 24
Altri autori (Persone)	MukhopadhyaySwapna RothWolff-Michael
Disciplina	370
Soggetti	Mathematics - Study and teaching Mathematics - Study and teaching - United States Electronic books.
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Description based upon print version of record.
Nota di bibliografia	Includes bibliographical references.
Nota di contenuto	pt. I. Mathematics and politics of knowledge -- pt. II. Ethnomathematics -- pt. III. Learning to see mathematically -- pt. IV. Mathematics education for social justice.
Sommario/riassunto	This book grew out of a public lecture series, Alternative forms of knowledge construction in mathematics, conceived and organized by the first editor, and held annually at Portland State University from 2006. Starting from the position that mathematics is a human construction, implying that it cannot be separated from its historical, cultural, social, and political contexts, the purpose of these lectures was to provide a public intellectual space to interrogate conceptions of mathematics and mathematics education, particularly by looking at mathematical practices that are not considered relevant to mainstream mathematics education. One of the main thrusts was to contemplate the fundamental question of whose mathematics is to be valorized in a multicultural world, a world in which, as Paolo Freire said, "The intellectual activity of those without power is always characterized as non-intellectual". To date, nineteen scholars (including the second

editor) have participated in the series. All of the lectures have been streamed for global dissemination at:<http://www.media.pdx.edu/dlcmedia/events/AFK/>. Most of the speakers contributed a chapter to this book, based either on their original talk or on a related topic. The book is divided into four sections dealing with: • Mathematics and the politics of knowledge • Ethnomathematics • Learning to see mathematically • Mathematics education for social justice.
