

1. Record Nr.	UNINA9910453584703321
Autore	Sangaramoorthy Thurka <1975->
Titolo	Treating AIDS : politics of difference, paradox of prevention / / Thurka Sangaramoorthy
Pubbl/distr/stampa	New Brunswick, New Jersey : , : Routledge, , 2014 ©2014
ISBN	0-8135-6374-7
Descrizione fisica	1 online resource (198 p.)
Disciplina	362.19697/92
Soggetti	AIDS (Disease) - Social aspects Health services accessibility - United States Social status - Health aspects - United States Haitians - United States - Social conditions Electronic books.
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Description based upon print version of record.
Nota di bibliografia	Includes bibliographical references and index.
Nota di contenuto	Frontmatter -- Contents -- List of Figures and Tables -- Acknowledgments -- 1. Treating Us, Treating Them -- 2. Treating the Numbers: HIV/AIDS Surveillance, Subjectivity, and Risk -- 3. Treating Culture: The Making of Experts and Communities -- 4. Treating Citizens: The Promise of Positive Living -- 5. Treating the Nation: Health Disparities and the Politics of Difference -- 6. Treating the West: Afterthoughts on Future Directions -- Notes -- References -- Index -- About the Author
Sommario/riassunto	There is an inherently powerful and complex paradox underlying HIV/AIDS prevention-between the focus on collective advocacy mobilized to combat global HIV/AIDS and the staggeringly disproportionate rates of HIV/AIDS in many places. In Treating AIDS, Thurka Sangaramoorthy examines the everyday practices of HIV/AIDS prevention in the United States from the perspective of AIDS experts and Haitian immigrants in South Florida. Although there is worldwide emphasis on the universality of HIV/AIDS as a social, political, economic, and biomedical problem, developments in HIV/AIDS prevention are rooted in and focused exclusively on disparities in

HIV/AIDS morbidity and mortality framed through the rubric of race, ethnicity, and nationality. Everyone is at equal risk for contracting HIV/AIDS, Sangaramoorthy notes, but the ways in which people experience and manage that risk-and the disease itself-is highly dependent on race, ethnic identity, sexuality, gender, immigration status, and other notions of "difference." Sangaramoorthy documents in detail the work of AIDS prevention programs and their effect on the health and well-being of Haitians, a transnational community long plagued by the stigma of being stereotyped in public discourse as disease carriers. By tracing the ways in which public knowledge of AIDS prevention science circulates from sites of surveillance and regulation, to various clinics and hospitals, to the social worlds embraced by this immigrant community, she ultimately demonstrates the ways in which AIDS prevention programs help to reinforce categories of individual and collective difference, and how they continue to sustain the persistent and pernicious idea of race and ethnicity as risk factors for the disease.
