

1. Record Nr.	UNINA9910453598203321
Autore	Smith Moyra
Titolo	Mental retardation and developmental delay [[electronic resource] ] : genetic and epigenetic factors // Moyra Smith
Pubbl/distr/stampa	New York, N.Y., : Oxford University Press, 2006
ISBN	1-280-84391-8 0-19-803885-2
Descrizione fisica	1 online resource (338 p.)
Collana	Oxford Monographs on Medical Genetics
Altri autori (Persone)	ArfinStuart M Lottlra T
Disciplina	616.8588042
Soggetti	Intellectual disability - Etiology Intellectual disability - Genetic aspects Developmental disabilities - Etiology Developmental disabilities - Genetic aspects Electronic books.
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Description based upon print version of record.
Nota di bibliografia	Includes bibliographical references (p. 247-300) and index.
Nota di contenuto	Contents; Contributors; Introduction; 1 Science, Society, and Mental Retardation: A History; 2 Neurogenesis, Neuronal Migration, Maturation, and Function: Insights into Learning and Memory; 3 Structural Brain Anomalies and Neural Tube Defects; 4 Mental Retardation Associated with Dysmorphology, Growth Retardation, or Overgrowth; 5 Mental Retardation Associated with Other Neurological Defects; 6 Mental Retardation That Develops after a Period of Normal Cognition; 7 Nonsyndromic Mental Retardation, Autism, and Language Deficits 8 Genomics, Functional Genomics, and Epigenetics: Relevance to Mental Retardation 9 Establishing a Diagnosis and Determining Etiology in Developmental Delay and Mental Retardation; 10 Epilogue: The Value of Genetic Diagnosis-Applying Knowledge about Etiology to Prevention and Treatment; References; Index
Sommario/riassunto	Introduction. 1. Science, Society, and Mental Retardation, A History. 2. Neurogenesis, Neuronal Migration, Maturation, and Function: Insights into Learning and Memory. 3. Structural Brain Anomalies and Neural

Tube Defects. 4. Mental Retardation Associated with Dysmorphology, Growth Retardation, or Overgrowth. 5. Mental Retardation Associated with Other Neurological Defects. 6. Mental Retardation that Develops After a Period of Normal Cognition. 7. Nonsyndromic Mental Retardation, Autism, and Language Deficits. 8. Genomics, Functional Genomics, and Epigenetics: Relevance to Mental Retardation. 9
