Note generali	Description based upon print version of record.
Nota di bibliografia	Includes bibliographies and index.
Nota di contenuto	Preliminary Material -- Introduction -- Reputation and Representation -- The Pedlar in the English Distribution Network -- The Pedlar in the Dutch Distribution Network -- Conclusion: A Comparative Perspective on Itinerant Networks -- Bibliography -- Index of Names, Places and Major Topics.
Sommario/riassunto	Itinerant salesmen, also called pedlars, street hawkers, hucksters and ballad singers are considered to be the most important distributors of popular printed matter in Europe between 1600 and 1850. A general assumption is that the pedlar travelling from town to countryside was

strongly distinct from the role of the established booksellers in the towns, selling books to the educated and affluent buyer. The commercial position of the urban pedlars, however, is very often underestimated. In this book, therefore, the itinerant book trade is studied in an English and Dutch, urban context, leading to a new perspective on the role of the pedlars as an intermediary between the established booksellers and an extensive, socially diverse reading public.

Note generali	Description based upon print version of record.
Nota di bibliografia	Includes bibliographical references and index.
Nota di contenuto	What's in a name? : culture, identity, and the "Taiwan problem" -- Where did the aborigines go? : reinstating plains aborigines in Taiwan's history -- "We savages didn't bind feet" : culture, colonial intervention, and long-route identity change -- "Having a wife is better than having a god" : ancestry, governmental power, and short-route identity change -- "They came with their hands tied behind their backs" : forced migrations, identity changes, and state classification in Hubei -- Theory and politics : understanding choices at the border to Han.
Sommario/riassunto	The "one China" policy officially supported by the People's Republic of China, the United States, and other countries asserts that there is only one China and Taiwan is a part of it. The debate over whether the people of Taiwan are Chinese or independently Taiwanese is, Melissa J. Brown argues, a matter of identity: Han ethnic identity, Chinese national identity, and the relationship of both of these to the new Taiwanese identity forged in the 1990's. In a unique comparison of ethnographic and historical case studies drawn from both Taiwan and China, Brown's book shows how identity is shaped by social experience-not culture and ancestry, as is commonly claimed in political rhetoric.

Titolo	Pseudomonas aeruginosa : Biofilm Formation, Infections and Treatments // edited by Theerthankar Das
Pubbl/distr/stampa	London : , : IntechOpen, , 2021
Descrizione fisica	1 online resource (114 pages)
Disciplina	616.0145
Soggetti	Pseudomonas aeruginosa infections
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Sommario/riassunto	Emerging antibiotic resistance of bacteria is driving us to catastrophic failure of the healthcare system. Pseudomonas aeruginosa is one such pathogen that is responsible for causing nosocomial infections, urinary tract infections, cystic fibrosis, otitis media, and infections of wounds and burns. P. aeruginosa is a critical pathogen as defined by the World Health Organization (WHO) due to its intrinsic and adaptive competence to defy antibiotics and persist as a superbug. This book covers a wide array of subjects relevant to bacterial biofilms specifically focusing on P. aeruginosa and associated infections. It provides readers with a clear and comprehensive overview of biofilm formation and associated detrimental impacts. In addition, this book also examines topics related to biosynthesis virulence factors by P. aeruginosa to facilitate biofilm formation, antibiotic resistance mechanisms, and infections.
