

1. Record Nr.	UNINA9910453666803321
Autore	Wick Mark R. <1952->
Titolo	Neoplastic mimics in dermatopathology / / Mark R. Wick, M.D., James W. Patterson, M.D
Pubbl/distr/stampa	New York : , : Demos Medical Publishing, , 2013
ISBN	1-61705-176-4
Descrizione fisica	1 online resource (xi, 194 pages) : color illustrations
Collana	Pathology of neoplastic mimics series
Altri autori (Persone)	PattersonJames W <1946-> (James Willis)
Disciplina	616.5
Soggetti	Skin - Diseases - Diagnosis Skin - Pathophysiology Electronic books.
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Description based upon print version of record.
Nota di bibliografia	Includes bibliographical references and index.
Nota di contenuto	Cover; Title; Copyright; Dedication; Contents; Preface; Acknowledgment; Chapter 1: Neoplastic Mimics: Overview; Philosophical and Practical Issues; Topographic Distribution and Biologic Nature of "Pseudotumors"; Idiopathic Pseudoneoplasms; Developmental Pseudoneoplasms; "Functional" Pseudoneoplasms; Iatrogenic Pseudoneoplasms; Infectious Pseudoneoplasms; Chapter 2: Pseudoneoplastic Mimics of Epithelial Tumors in the Skin; Pseudocarcinomatous (Pseudoepitheliomatous) Epidermal Hyperplasia; Pseudocarcinomatous Hyperplasia in Chronic Aseptic Dermatitis; Pseudocarcinomatous Hyperplasia in Association with Neoplasms; Pseudocarcinomatous Hyperplasia in Cutaneous Infections; Potential Mechanisms for Cutaneous Pseudocarcinomatous Hyperplasia; Pathologic Findings in Pseudocarcinomatous Hyperplasia and Differential Diagnosis with True Carcinomas; Epidermal Nevi and "Der Wulst"; Reactions to Monsel's Solution; Selected Bullous Dermatoses; Adnexal Nevi and other Pseudoneoplastic Appendageal Lesions; Sweat Glandular Proliferations; Basaloid Follicular Hamartoma; Sebaceous Proliferations Chapter 3: Imitators of Regressing and Regressed Melanocytic Neoplasms Chapter 4: Pseudoneoplastic Mesenchymal Lesions; Pseudoneoplastic Vascular Proliferations of the Skin; Acroangiodermatitis and Acral Capillary Angiomatosis; Pigmented

Purpura (Majocchi-Schamberg Disease); Proliferative Scars;  
 Intravascular Papillary Endothelial Hyperplasia (Masson's Lesion);  
 Angiokeratoma; Bacillary Angiomatosis; Telangiectasias;  
 Pseudosarcomatous Polyps; "Inflammatory Pseudotumors" of the Skin;  
 Proliferative Noninfectious Granulomatous Lesions; Other  
 Pseudoneoplastic Reactions to Infection  
 "Histoid" Leprosy Nonlepromatous Mycobacterial Pseudotumors of the  
 Skin; Hamartomatous Mesenchymal Lesions of the Skin; Fibrous  
 Hamartoma; Smooth Muscle Hamartomas and "Becker's Nevii";  
 Rhabdomyomatous Mesenchymal Hamartomas; Idiosyncratic  
 Proliferative Mesenchymal Reactions to Injury; Nodular (Proliferative;  
 Pseudosarcomatous; Infiltrative) Fasciitis; Postoperative Spindle Cell  
 Nodules; Keloids; Ruptured and Proliferating Ganglion Cysts; Chapter 5:  
 Pseudoneoplastic Neurocutaneous Rests and Ectopias; Rudimentary  
 Meningocele (Meningoetheliomatous Hamartoma)  
 Cutaneous Glial Heterotopia ("Nasal Glioma") Chapter 6:  
 Pseudoneoplastic Lymphoreticular Infiltrates of the Skin;  
 Pseudoneoplastic Lymphoreticular Infiltrates: An Overview;  
 Nonneoplastic Conditions Producing "Lichenoid" Infiltrates that  
 Simulate Cutaneous T-Cell lymphoma; Other Nonneoplastic Lymphoid  
 Infiltrates that may Mimic Hematologic Lesions; Lupus Profundus and  
 "Cytophagic Panniculitis"; "Reactive Angioendotheliomatosis";  
 Cutaneous Cellular Responses to Hematopoietic Colony-Stimulating  
 Agents; Other Nonneoplastic CD30+ Cutaneous Eruptions; Kimura's  
 Disease  
 Plasma Cell Infiltrates of the Skin and Mucosae that can Imitate  
 Plasmacytomas

---

## Sommario/riassunto

Virtually all sites in the human body can host lesions that simulate  
 neoplasms, and many of these "pseudotumors" can simulate  
 neoplasms on all levels of analysis-- clinical, radiologic, and  
 pathologic-- thus they represent particular diagnostic pitfalls for the  
 pathologist that can ultimately lead to therapeutic misdirection. This  
 book provides the pathologist with detailed morphologic descriptions  
 and diagnostic guidance in recognizing these neoplastic mimics as they  
 occur in the skin. In addition, descriptions and diagnostic guidance are  
 provided for the range of skin lesions that may mimi
