<b>Sommario/riassunto</b>	This book looks at a largely untapped energy efficiency market, the public sector. Efficiency potential in this sector is substantial, but implementing energy savings programs have been complicated by a

number of factors, including limited incentives to lower energy costs, rigid budgeting and procurement procedures, and limited access to financing. This book looks at energy savings performance contracts (ESPCs) as a means of overcoming some of these barriers in public facilities, since they can outsource the full project cycle to a commercial service provider. ESPCs allow public agencies to sol
