Sommario/riassunto	Discover what's new in C# and .NET for Windows programming. This book is a condensed code and syntax reference to the C# programming language, updated with the latest features of version 10 for .NET 6. You'll review the essential C# 10 and earlier syntax, not previously covered, in a well-organized format that can be used as a handy reference. Specifically, unions, generic attributes, CallerArgumentExpression, params span, Records, Init only setters, Top-level statements, Pattern matching enhancements, Native sized integers, Function pointers and more. You'll find a concise reference to the C# language syntax: short, simple, and focused code examples; a well laid out table of contents; and a comprehensive index allowing easy review. You won't find any technical jargon, bloated samples, drawn-out history lessons, or witty stories. What you will find is a

language reference that is to the point and highly accessible. The book is a must-have for any C# programmer. You will: Employ nullable reference types Work with ranges and indices Apply recursive patterns to your applications Use switch expressions.

Sommario/riassunto	In the context of globalization changes in educational systems, it is important to modify approaches to the educational process and introduce learning technologies that allow for maximum involvement in learning. One such technology is the technology of active learning, which engages learners through participation in the cognitive process and certain tasks as well as through the collective activities of the subjects of the educational process. This book discusses the theoretical analysis of active learning and contains practical recommendations for its implementation.

Sommario/riassunto	Break through the hype and learn how to extract actionable intelligence from the flood of IoT data About This Book Make better business decisions and acquire greater control of your IoT infrastructure Learn techniques to solve unique problems associated with IoT and examine and analyze data from your IoT devices Uncover the business potential generated by data from IoT devices and bring down business costs Who This Book Is For This book targets developers, IoT professionals, and those in the field of data science who are trying to solve business problems through IoT devices and would like to analyze IoT data. IoT enthusiasts, managers, and entrepreneurs who would like to make the most of IoT will find this equally useful. A prior knowledge of IoT would be helpful but is not necessary. Some prior programming experience would be useful What You Will Learn Overcome the challenges IoT data brings to analytics Understand the variety of transmission protocols for IoT along with their strengths and weaknesses Learn how data flows from the IoT device to the final data set Develop techniques to wring value from IoT data Apply geospatial analytics to IoT data Use machine learning as a predictive method on IoT data Implement best strategies to get the most from IoT analytics Master the economics of IoT analytics in order to optimize business value In Detail We start with the perplexing task of extracting value from huge amounts of barely

intelligible data. The data takes a convoluted route just to be on the servers for analysis, but insights can emerge through visualization and statistical modeling techniques. You will learn to extract value from IoT big data using multiple analytic techniques. Next we review how IoT devices generate data and how the information travels over networks. You'll get to know strategies to collect and store the data to optimize the potential for analytics, and strategies to handle data quality concerns. Cloud resources are a great match for IoT analytics, so Amazon Web Services, Microsoft Azure, and PTC ThingWorx are reviewed in detail next. Geospatial analytics is then introduced as a way to leverage location information. Combining IoT data with environmental data is also discussed as a way to enhance predictive capability. We'll also review the economics of IoT analytics and you'll discover ways to optimize business value. By the end of the book, you'll know how to handle scale for both data storage and analytics, how Apache...

Nota di contenuto	Camp Map and Roster -- Part One. Background, Beginnings, and the Impact of the CCC -- The Old Forest and the Timber Industry in Southern Illinois -- The Great Depression in Southern Illinois and the Establishment of the Shawnee National Forest -- The Establishment of the Civilian Conservation Corps -- CCC Work Projects in Southern Illinois -- Life in the CCC Camps -- The Last Years and Legacies of the CCC -- Part Two. The Southern Illinois CCC Camp Compendium -- The Forest Service Camps: Camp Cadiz, DF-9, F-9; Camp Delta, F-3; Camp Eddyville, F-4; Camp Glenn, F-1; Camp Herod, DF-7, F-7; Camp Hicks, F-5; Camp Hutchins, F-8; Camp Kedron, F-6; Camp Pomona, F-2; Camp Shawneetown, F-11, PE-64, SCS-17; Camp Simpson, F-12; Camp Union, S-51, F-10 -- The Private Erosion and Soil Conservation Service Camps: CCC Camp Benton, SCS-22; CCC Camp Dixon Springs, SCS-1; Camp Grayville, SCS-6; CCC Camp Marion, PE-72, SCS-27; Camp Metropolis, DPE-68; CCC Camp Mill Creek, PE-71, SCS-21; Camp Mounds, DPE-69, SCS-29; Camp Murphysboro "Riverside," PE-66, SCS-20; Camp Norris City, SCS-24; Camp Pinckneyville, PE-66; Camp Randolph, PE-53; Camp Saline (Eldorado), PE-52; Camp Sparta, SCS-34; Camp Waterloo, PE-73, SCS-23; note: the histories of the State Park Camps Giant City, SP-11 and Stonefort, SP-41 are detailed in a separate work by this author, Giant City State Park and the Civilian Conservation Corps -- Appendixes.
Sommario/riassunto	"Drawing on more than thirty years of meticulous research, Kay Rippelmeyer details the Depression-era history of the simultaneous creation of the Civilian Conservation Corps (CCC) and the Shawnee National Forest in southern Illinois. Through the stories of the men who worked in CCC camps devoted to soil and forest conservation projects, she offers a fascinating look into an era of utmost significance to the identity, citizens, wildlife, and natural landscape of the region. Rippelmeyer outlines the geologic and geographic history of southern Illinois, from Native American uses of the land to the timber industry's decimation of the forest by the 1920s. Detailing both the economic hardships and agricultural land abuse plaguing the region during the Depression, she reveals how the creation of the CCC under Franklin Delano Roosevelt coincided with the regional campaign for a national forest and how locals first became aware of and involved with the program. Rippelmeyer mined CCC camp records from the National Archives, newspaper accounts and other correspondence and conducted dozens of oral interviews with workers and their families to re-create life in the camps. An extensive camp compendium augments the volume, featuring numerous photographs, camp locations and dates of operation, work history, and company rosters. Satisfying public curiosity and the need for factual information about the camps in southern Illinois, this is an essential contribution to regional history and a window to the national impact of the CCC"--

Sommario/riassunto	This book constitutes the refereed proceedings of the 11th International Joint Conference on E-Business and Telecommunications, ICETE 2014, held in Vienna, Austria, in August 2014. ICETE is a joint international conference integrating four major areas of knowledge that are divided into six corresponding conferences: International Conference on Data Communication Networking, DCNET; International Conference on E-Business, ICE-B; International Conference on Optical Communication Systems, OPTICS; International Conference on Security

and Cryptography, SECRIPT; International Conference on Wireless Information Systems, WINSYS; and International Conference on Signal Processing and Multimedia, SIGMAP. The 27 full papers presented were carefully reviewed and selected from 328 submissions. The papers cover the following key areas of e-business and telecommunications: data communication networking; e-business; optical communication systems; security and cryptography; signal processing and multimedia applications; wireless information networks and systems.
