Sommario/riassunto	<p>The complex nature of many chronic diseases, which affect people many different ways, requires a multifaceted response that will meet the needs of the individual patient. Yet while everyone agrees that the traditional relationship between an individual patient and a single doctor is inappropriate, there is much less agreement about what should replace it. . . Many countries are now experimenting with new approaches to delivering care in ways that do meet the complex needs of people with chronic disorders, redesigning delivery systems to coordinate activities across the continuum of care.
