Sommario/riassunto	In this timely volume, prestigious contributors incorporate new

knowledge from general psychology into a more comprehensive and accessible view of emotion in adult development and aging. The first chapter sets the stage by providing an overview of emotion across the entire life-span. Subsequent chapters examine and consider thought-provoking themes including: how feelings are used in interpersonal communication across the years of adulthood; the linkage between stressful life events and the occurrence of disease; and the changes in emotional intensity and emotional understanding as we age. Thi
