

1. Record Nr.	UNINA9910453886503321
Titolo	HIV and aging / / edited by Sharon Dian Lee
Pubbl/distr/stampa	New York : , : Informa Healthcare, , 2008
ISBN	0-429-14832-1 1-281-73194-3 9786611731946 1-4200-6598-X
Descrizione fisica	1 online resource (154 p.)
Altri autori (Persone)	LeeSharon Dian
Disciplina	616.97/9207
Soggetti	AIDS (Disease) - Age factors Electronic books.
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Description based upon print version of record.
Nota di bibliografia	Includes bibliographical references and index.
Nota di contenuto	The immune system -- The neurologic system -- Depression -- The cardiovascular system -- The endocrine system -- The renal system -- The pulmonary system -- Cancer.
Sommario/riassunto	More than two decades into the global HIV epidemic, Many HIV positive patients who have access to antiretroviral medications are entering the senior citizen age bracket. A growing number of HIV positive patients will now face a new set of complicated medical problems related to aging. HIV and Aging examines the current effects of HIV and HIV medications on the aging patient relating to immune system, neurologic, cardiovascular, pulmonary, renal gastrointestinal, hormonal, bone, joint, and oncological issues. Written by todays top experts HIV and Aging answers questions like:.. what effects do HIV medications have on cardiovascular health.; do normal immune system changes occur in the aging patient, and how are they affected by HIV and HIV medications.; what are the effects of the drug interactions between antiretrovirals and medicines used to treat memory loss.
