Sommario/riassunto

The business and academic communities continue to have an interest in the concepts of knowledge management and strategic competencies or core capabilities. This book attempts to establish the links between strategic competencies, knowledge management, organisational learning and innovation - specifically, how an organisation identifies, assesses and exploits its competencies, and translates these into new processes, products and services. The contributors to this book include leading researchers and practitioners in the field. Adopting a practical but rigorous approach to the subject, they focus
