Sommario/riassunto

Water resource management throughout the world is a very complicated issue, involving various aspects and dimensions and a well-coordinated set of policies. A well-designed water policy is a multi-faceted concerted intervention, which could be specific to just one set of political and physical socio-economic conditions. A framework to analyse the interaction between policy design and implementation can assist in improving both of these in various physical, economic and political situations. This book focuses on the interaction between policy making and strategic behaviour of policy makers, water
