#### Sommario/riassunto

The world's attention to the countries of the Middle East and North Africa (MENA) region has often been dominated by headline issues: conflict, sanctions, political turmoil, and rising oil prices. Little of this international attention has considered the broad range of development challenges facing this diverse group of countries. *Breaking the Barriers* reflects the collected thinking of the World Bank's Office of the Chief Economist for the MENA Region on the long-term development challenges facing the region and the reform priorities and strategies for effectively meeting these challenges.
