Soggetti	Legal ethics - United States Law - Moral and ethical aspects - United States Law and ethics Administrative responsibility - United States
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Title from publisher's bibliographic system (viewed on 05 Oct 2015).
Nota di bibliografia	Includes bibliographical references and index.
Nota di contenuto	Law and office -- The stakes : the interests of others in official actions -- Officials' obligations arise from more than the law alone -- The moral obligations of legal officials -- Patterns of relationship between legal and moral obligations -- Breaching obligations -- Tools for the trade : maxims and fallacies.
Sommario/riassunto	What should the people expect from their legal officials? This book asks whether officials can be moral and still follow the law, answering that the law requires them to do so. It revives the idea of the good official - the good lawyer, the good judge, the good president, the good legislator - that guided Cicero and Washington and that we seem to have forgotten. Based on stories and law cases from America's

founding to the present, this book examines what is good and right in law and why officials must care. This overview of official duties, from oaths to the law itself, explains how morals and law work together to create freedom and justice, and it provides useful maxims to argue for the right answer in hard cases. Important for scholars but useful for lawyers and readable by anybody, this book explains how American law ought to work.

2. Record Nr.	UNINA9910823752703321
Autore	Suriawinata Arief A.
Titolo	Neoplastic mimics in gastrointestinal and liver pathology / / Arief A. Suriawinata ; acquisitions editor, Rich Winters
Pubbl/distr/stampa	New York, New York : , : Demos Medical, , 2015 ©2015
ISBN	1-61705-194-2
Descrizione fisica	1 online resource (262 p.)
Collana	Pathology of Neoplastic Mimics Series
Disciplina	616.99/433
Soggetti	Digestive organs - Cancer Digestive organs - Pathophysiology Diagnosis, Differential
Lingua di pubblicazione	Inglese
