Autore	Hinterwimmer Stefan <1972->
Titolo	Q-adverbs as selective binders [[electronic resource]] : the quantificational variability of free relatives and definite DPs / / by Stefan Hinterwimmer
Pubbl/distr/stampa	Berlin ; ; New York, : Mouton de Gruyter, 2008
ISBN	1-282-19473-9 9786612194733 3-11-019920-3
Descrizione fisica	1 online resource (300 p.)
Collana	Interface explorations ; ; 14
Classificazione	ET 455
Disciplina	415
Soggetti	Grammar, Comparative and general - Quantifiers Grammar, Comparative and general - Adverbials Definiteness (Linguistics) Grammar, Comparative and general - Relative clauses Semantics Electronic books.
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Description based upon print version of record.
Nota di bibliografia	Includes bibliographical references and index.
Nota di contenuto	Frontmatter -- Contents -- Introduction -- Chapter 1: Quantificational Variability Effects in Sentences with Free Relatives -- Chapter 2: The Case of Singular Definites and Universally Quantified DPs -- Chapter 3: QVEs in Sentences with FRs or Plural Definites -- Backmatter
Sommario/riassunto	This book deals with the interpretation of adverbially quantified sentences containing definite DPs and Free Relatives (FR). Thereby, it concentrates on the origins of Quantificational Variability Effects (QVEs), i.e. readings according to which the respective quantificational adverb seems to quantify over the individuals denoted by the respective DP/FR. QVEs are usually discussed only in connection with singular indefinites and bare plurals. This book therefore provides the first comprehensive account of QVEs with definite DPs and Free Relatives (while also discussing singular indefinites and bare plurals). Presenting new empirical observations and arguments for the assumption that Q-adverbs quantify over situations exclusively, it is also an important

contribution to the theoretical debate concerning the quantificational domain of Q-adverbs.. It is of interest to linguists working in formal semantics and the syntax-semantics interface as well as to philosophers of language who are interested in adverbial quantification and situation semantics. Furthermore, it offers an introduction to the core issues of situation semantics and adverbial quantification and is therefore accessible to graduate students interested in these topics.

2. Record Nr.	UNINA9910477106003321
Autore	Heyen Sonja
Titolo	Die AfD in den Medien : Eine Framing-Analyse der Partei am Beispiel politischer Talkshows / / Sonja Heyen
Pubbl/distr/stampa	Berlin : , : Carl Grossmann Verlag, , 2020
Descrizione fisica	1 online resource (190 pages)
Collana	Schriftenreihe Medienrecht & Medientheorie
Disciplina	791.456
Soggetti	Television talk shows - Germany
Lingua di pubblicazione	Tedesco
Formato	Materiale a stampa
Livello bibliografico	Monografia
Sommario/riassunto	"Purpose - This master thesis examines the influence of political framing by the German party 'Alternative fur Deutschland' (AfD) on the medial debate as a contemporary issue. Approach - Based on the concept of framing, public broadcast talk shows about the German regional elections in autumn 2019 were analysed regarding their handling of strategic political frames. By comparing the results of this content analysis with a subsequent examination of follow-up communication among selected key online-media, conclusions about the influence of political framing on the medial debate were drawn. Findings - In accordance with the findings, a distinctive transfer of strategic framing is delivered throughout the analysed media coverage, focussing on the polarising issue of how to politically classify the AfD. Practical Implications - The ascertained orientation in journalistic framing was criticised and recommendations towards a recollection of

journalistic standards were given.".
