Sommario/riassunto	Increasingly, children with significant medical issues are being incorporated into the general school environment. Given the potential effects of various disorders and conditions on educational prognosis, it is important for neuropsychologists, pediatric psychologists, school psychologists, teachers, and other professionals who are working with these children to be aware of the nature and course of these many disorders as well as the avenues for rehabilitation, accommodation, and classroom modification. In Children with Complex Medical Issues in Schools , Dr. Castillo bridges the gap between r
