                      Index

   Sommario/riassunto Max Weber's The Protestant Ethic and the Spirit of Capitalism continues
                      to be one of the most influential texts in the sociology of modern
                      Western societies. Although Weber never produced the further essays
                      with which he intended to extend the study, he did complete four
                      lengthy Replies to reviews of the text by two German historians. Written

between 1907 and 1910, the Replies offer a fascinating insight into Weber's intentions in the original study, and the present volume is the first complete translation of all four Replies in English.
