

1. Record Nr.	UNINA9910454206003321
Titolo	The human embryonic stem cell debate [[electronic resource]] : science, ethics, and public policy // edited by Suzanne Holland, Karen Lebacqz, and Laurie Zoloth
Pubbl/distr/stampa	Cambridge, MA, : MIT Press, c2001
ISBN	0-585-44264-9 9786612099786 1-282-09978-7 0-262-27556-2
Descrizione fisica	1 online resource (285 p.)
Collana	Basic bioethics
Altri autori (Persone)	HollandSuzanne LebacqzKaren <1945-> ZolothLaurie
Disciplina	174.2
Soggetti	Human embryo - Research - Moral and ethical aspects Stem cells - Research - Moral and ethical aspects Electronic books.
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Description based upon print version of record.
Nota di bibliografia	Includes bibliographical references and index.
Nota di contenuto	Contents ; Series Foreword; Acknowledgments; Introduction; I - The Science and Background of Human Embryonic Stem Cells; 1 - Human Embryonic Stem Cells: A Primer on the Technology and Its Medical Applications ; 2 - Human Embryonic Stem Cells ; 3 - The Stem Cell Debate in Historical Context ; II - Raising the Ethical Issues ; 4 - On the Ethics and Politics of Embryonic Stem Cell Research ; 5 - Human Embryonic Stem Cell Research: Comments on the NBAC Report ; 6 - NBAC's Arguments on Embryo Research: Strengths and Weaknesses 7 - Beyond the Embryo: A Feminist Appraisal of the Embryonic Stem Cell Debate III - Angles of Vision ; 8 - Stem Cell Research-A Jewish Perspective ; 9 - The Ethics of the Eighth Day: Jewish Bioethics and Research on Human Embryonic Stem Cells; 10 - Roman Catholic Views on Research Involving Human Embryonic Stem Cells ; 11 - Human Embryonic Stem Cells: Possible Approaches from a Catholic Perspective ; 12 - Embryonic Stem Cells and the Theology of Dignity ; 13 - Some

Protestant Reflections; 14 - On the Elusive Nature of Respect ; 15 - Ethical Issues: A Secular Perspective
IV - Public Discourse, Oversight, and the Role of Research in Society 16 - From the Micro to the Macro ; 17 - "Expert Bioethics" as Professional Discourse: The Case of Stem Cells ; 18 - Stem Cells: Shaping the Future in Public Policy ; 19 - Leaps and Boundaries: Expanding Oversight of Human Stem Cell Research ; 20 - Jordan's Banks: A View from the First Years of Human Embryonic Stem Cell Research; Glossary ; Contributors ; Index

Sommario/riassunto

Human embryonic stem cells can divide indefinitely and have the potential to develop into many types of tissue. Research on these cells is essential to one of the most intriguing medical frontiers, regenerative medicine. It also raises a host of difficult ethical issues and has sparked great public interest and controversy. This book offers a foundation for thinking about the many issues involved in human embryonic stem cell research. It considers questions about the nature of human life, the limits of intervention into human cells and tissues, and the meaning of our corporeal existence. The fact that stem cells may be derived from living embryos that are destroyed in the process or from aborted fetuses ties the discussion of stem cell research to the ongoing debates on abortion. In addition to these issues, the essays in the book touch on broader questions such as who should approve controversial research and what constitutes human dignity, respect, and justice. The book contains contributions from the Ethics Advisory Board of the Geron Corporation; excerpts from expert testimony given before the National Bioethics Advisory Commission, which helped shape recent National Institutes of Health policy; and original analytical essays on the implications of this research.
