-- Sustaining a coalition: case study: the New York Association on HIV over Fifty / by Kathleen M. Nokes.

Sommario/riassunto

This volume focuses on the ways in which HIV/AIDS can affect older adults. The chapters in this book discuss the variety of HIV/AIDS problems that we face at the individual, family, and community levels. Topics examined include demographics and epidemiological aspects of HIV disease with this population; prevention of HIV disease; issues impacting individuals in a medical, psychological, and social context; and service needs. Originally published as a special issue of the Journal of Mental Health and Aging, the volume contains new chapters on demographics, HIV prevention and education, and eff
