Nota di contenuto	Contents; List of Color Illustrations; Preface; Contributors; I. Methods of Comprehensive Neuropsychological Assessment; II. Neuropsychiatric Disorders; III. Psychosocial Consequences of Neuropsychological Impairment; Author Index; Subject Index
Sommario/riassunto	This is a major revision of a standard reference work for neuropsychologists, psychiatrists, and neurologists. About one-half of the book contains entirely new work by new contributors. New topics not covered in the previous editions include consideration of common sources of neurocognitive morbidity, such as multiple sclerosis, diabetes, and exposure to heavy metals; psychiatric and behavioral disorders associated with traumatic brain injury; neuropsychology in relation to everyday functioning; the effects of cognitive impairment on driving skills, and adherence to medical treatments. The Thi
