

1. Record Nr.	UNINA9910454310003321
Titolo	Conditioned taste aversion [[electronic resource]] : behavioral and neural processes // edited by Steve Reilly, Todd R. Schachtman
Pubbl/distr/stampa	Oxford ; ; New York, : Oxford University Press, 2009
ISBN	1-281-94439-4 9786611944391 0-19-971685-4
Descrizione fisica	1 online resource (593 p.)
Altri autori (Persone)	ReillySteve SchachtmanTodd R
Disciplina	152.1/67
Soggetti	Taste Aversive stimuli Electronic books.
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Description based upon print version of record.
Nota di bibliografia	Includes bibliographical references and index.
Nota di contenuto	Contents; Foreword; Contributors; Part I. Introduction and Historical Significance; Part II. Behavioral Processes; Part III. Neural Analysis and Physiological Mechanisms; Part IV. Clinical Application of Research and Target Populations; Author Index; Subject Index
Sommario/riassunto	Conditioned taste aversion is arguably the most important learning process that humans and animals possess because it prevents the repeated self-administration of toxic food. It has not only profoundly influenced the content and direction of learning theory, but also has important human nutritional and clinical significance. In addition to its direct relevance to food selection, dietary habits, and eating disorders, it is significant for certain clinical populations that develop it as a consequence of their treatment. The study of conditioned taste aversions has invigorated new theory and rese
