

1. Record Nr.	UNINA9910454341003321
Titolo	Data against natural disasters [[electronic resource]] : establishing effective systems for relief, recovery, and reconstruction / / edited by Samia Amin, Markus Goldstein
Pubbl/distr/stampa	Washington DC, : World Bank, c2008
ISBN	0-8213-7453-2
Descrizione fisica	1 online resource (342 p.)
Altri autori (Persone)	AminSamia <1980-> GoldsteinMarkus P. <1970->
Disciplina	363.34/80684
Soggetti	Disaster relief - Developing countries Information storage and retrieval systems - Natural disasters Emergency management - Developing countries Electronic books.
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Description based upon print version of record.
Nota di bibliografia	Includes bibliographical references and index.
Nota di contenuto	Using data against disasters : overview and synthesis of lessons learned / Samia Amin, Marcus Cox, and Markus Goldstein -- Information gaps in relief, recovery, and reconstruction in the aftermath of natural disasters / Claude de Ville de Goyet -- United Nations' efforts to strengthen information management for disaster preparedness and response / Brendan McDonald and Patrick Gordon -- The use of a logistics support system in Guatemala and Haiti / Claude de Ville de Goyet -- World Bank : tracking reconstruction funds in Indonesia after the 2004 earthquake and tsunami / Jack McKeon -- The flow of information during disaster response : the case of the Mozambique floods, 2007 / Marcin Sasin -- Data management systems after the earthquake in Pakistan : the lessons of Riseapak / Samia Amin -- Ex ante preparedness for disaster management : Sahana in Sri Lanka / M. A.L.R. Perera.
Sommario/riassunto	This book provides guidance to policy makers seeking to design effective monitoring systems for disaster response management. This volume describes the data needs that arise after natural disasters, assesses current data management reform efforts, and discusses the

institutional preconditions and tactical and strategic steps necessary for establishing systems that work. Six country case studies elaborate lessons from the success and failures of efforts to establish innovative monitoring systems in the aftermath of disasters in Guatemala, Haiti, Indonesia, Mozambique, Pakistan, and Sri Lanka.
