Sommario/riassunto	<p>In this study Dr Haslam examines how the quantity, function and ecology of water changes as it moves from watershed to river. The development of river and riverscape, their ecology, the effect of human activities (such as water abstractions, flood control and management for recreational use) and water resources are described both in principle and using case histories. Contrasting examples are given from across the world, including Iceland, Hungary, Malta, Britain and the USA, which enables understanding of how water and riverscape interact with each other, and with human impact. The study, development and loss of water resources is also described, including the extreme example of Malta, whose clean water now depends solely on oil imports. This innovative book is written for graduate students and professionals interested in how water and riverscape interact.</p>

Autore	Coles Elisha <1640?-1680.>
Titolo	A dictionary, English-Latin, and Latin-English [[electronic resource] ] : containing all things necessary for the translating of either language into the other. To which end many things that were erroneous are rectified, many superfluities retrenched, and very many defects supplied. And all suited to the meanest capacities, in a plainer method than heretofore: being (for ease) reduced into an alphabetical order, and explained in the mother tongue. And towards the completing the English part (which hath been long desired) here are added thousands of words, phrases, proverbs, proper names, and many other useful things mentioned in the preface to the work. The second edition enlarged. By Elisha Coles, late of Magd. Coll. Oxon
Pubbl/distr/stampa	London, : printed for John Richardson, for George Sawbridg, T. Basset, John Wright, Richard Chiswell, 1679
